

LuxeMaurice AI training pack

A practical user guide and training walkthrough of the live Private Access Request journey: client submission, advisor review, and operator lead management. Prepared for Jan and the LuxeMaurice team by CorpFlowAI.

[Cover note](#) [Training order](#) [Content updates](#) [Client journey](#) [Advisor review](#) [Operator workflow](#) [Limitations](#) [Screenshot gallery](#)

Cover note

Dear Jan,

Please find the updated LuxeMaurice user guide and training walkthrough material prepared for your team. It covers how a guest submits a Private Access Request, how advisors review requests after sign-in, how operators manage stage and notes in Change Console, and how website content updates are provided, applied, and verified.

Screenshots use a fictional demonstration identity (**LuxeMaurice Training User** / `training@example.invalid`) so the pack stays safe for internal training. The walkthrough material is structured for a guided training session; it does not claim that recorded videos are included.

Please review and confirm whether this is acceptable, or let us know if you would like any changes before we treat the training pack as final.

Kind regards,
Anton
CorpFlowAI

Verification edition: 15 July 2026

Live site: <https://lux.corpflowai.com/client/luxe-maurice-ai>

Suggested training order

1. **Client journey** - Landing → Access catalogue → Private Access Request → on-screen LM-REQ reference (graphics 01-04).
2. **Advisor journey** - Sign in → Advisor Pipeline → Received for advisor review → Demonstration records vs live rows (graphics 05-07).
3. **Operator workflow** - Open /change → LEADS → select lead → OPERATOR ACTIONS → stage / next-action practice (graphic 08).
4. **Live practice round** - Submit one training request, review it, update it in Change Console, then agree how real human-led follow-up will work.

How to upload and update LuxeMaurice website content

LuxeMaurice already has two protected tools. Use <https://lux.corpflowai.com/properties/admin> for property/listing text and visibility. Use <https://lux.corpflowai.com/change> for images, videos, and PDF/document attachments.

This is not a general CMS and nothing auto-publishes. The existing workflow is: **upload** → **review** → **link** → **publish** → **verify**. Jan can use it with the authorised LuxeMaurice tenant/editor account; Anton can co-pilot. Jan's complete production walk-through remains to be verified.

A. Property/listing text and visibility — /properties/admin

1. Open <https://lux.corpflowai.com/properties/admin> and sign in.
2. Select an opportunity or choose **New private opportunity**.
3. Complete title, slug, region, property type, listing status, price guidance, teaser, description, highlights, bedrooms, bathrooms, and area.
4. Select **Save**.
5. Set visibility deliberately: **draft**, **preview**, **published**, or **archived**.
6. Preview first; after publication verify [/properties](#) and [/property/<slug>](#).

Saving text does not make it public automatically.

Create or edit listing text and visibility

Description
Fictional training copy used only to demonstrate the existing listing editor.

Save private opportunity

Saving and visibility are deliberate controls. Nothing auto-publishes.

Figure 11 - Illustrated existing property/listing editor and visibility controls

B. Images/photos — /change

1. Open <https://lux.corpflowai.com/change> and select the relevant C1–C4 content sprint ticket (C1 homepage imagery; C2 first real opportunity).
2. In **Add content**, select **Upload content** and choose an image.
3. Confirm the green upload result and the file in **Attachments**.
4. Select **Mark reviewed**.
5. Link the reviewed image to the property/opportunity slug.
6. Choose **hero**, **card**, or **gallery**; add public alt/caption details and gallery order/cover where needed.
7. Select **Publish**, then verify the corresponding live page.

The current endpoint accepts **image/***, **video/***, and exact **application/pdf**. The current default limit is 3 MB per file and 8 files per ticket unless existing deployment configuration overrides it.

C2 · First private opportunity

C4 · Jan validation

C1 CONTENT SPRINT

Add content

Attach client-approved images, videos, or documents to this sprint task.

Upload content

1. Choose a supported image, video, or PDF.
2. Confirm the uploaded attachment appears.
3. Review it before any public use.

Nothing becomes public at the upload step.

Linking keeps the file private until Publish is selected.

Publish approved image

Figure 10 - Illustrated attachment review, link, and image publish controls

C. PDFs/documents

Use **Upload content** on the relevant `/change` ticket. PDFs are accepted as `application/pdf`, appear as governed attachments, and can be securely viewed/downloaded by authorised users.

Current public-display limit: Luxe pages do not currently compose a public brochure/download component. CorpFlowAI must add or configure the approved public link/download surface before a PDF can appear publicly. Upload alone is not publication.

D. Videos/walkthroughs

The existing endpoint accepts `video/*` for private governed review. Public Luxe property media currently serves only reviewed and explicitly published `image/*`; there is no public video player, transcoding flow, or video publish slot.

Use a YouTube, Vimeo, or approved private-hosted link for operator placement after approval, or upload raw video for private review and agree the hosting/embed step separately.

E. What is self-service and what remains governed

- **Jan can:** create/edit listing text and visibility in `/properties/admin`; upload supported files in `/change`; review attachments; link approved images; and use explicit image publish controls with the authorised account.
- **CorpFlowAI/operator still checks:** rights, privacy, public wording, correct property/slot, any missing PDF/video display surface, and the final live result.

F. Verify after publication

- Content accuracy and image order.
- That each document or video opens correctly.
- That visibility and privacy are correct.
- That the call to action and request flow are correct.

Jan replies **Approved** or **Changes needed**. CorpFlowAI applies agreed corrections and sends the updated link for final confirmation.

1. Client journey - Private Access Request

Journey at a glance

1. A prospective client visits LuxeMaurice AI.

2. They explore private opportunities in the access catalogue.
3. They submit a Private Access Request.
4. They receive an on-screen **LM-REQ-...** reference.
5. An authorised advisor reviews the request in the Advisor Pipeline.
6. The LuxeMaurice operator manages the lead in Change Console.
7. Follow-up remains **human-led** (no automated email / WhatsApp / SMS from the platform today).

Open the site

Go to <https://lux.corpflowai.com/client/luxe-maurice-ai>. You will see the landing page with private access channels: residences, yachts, aviation, island experiences, and advisory introductions.

Figure 1 - LuxeMaurice AI home

Review private opportunities

Open **Access catalogue** at <https://lux.corpflowai.com/client/luxe-maurice-ai/properties>. Browse categories and open an opportunity, or continue to a general access request.

Figure 2 - Access catalogue

Submit a Private Access Request

Select **Request access** (<https://lux.corpflowai.com/client/luxe-maurice-ai/buyer>). Complete the form fields that apply, then select **Submit access request**. Wait for confirmation before closing the page.

2. Advisor review - Advisor Pipeline

Route: <https://lux.corpflowai.com/client/luxe-maurice-ai/crm>

- 1. Sign in with LuxeMaurice tenant credentials.
- 2. Open **Advisor pipeline**.
- 3. Review live rows under **Received for advisor review**.
- 4. Treat **Demonstration records** as layout examples only - not live client enquiries.

Important: The Advisor Pipeline is a **review surface** and is **read-only** for stage and notes today. Outbound email / WhatsApp / SMS automation is **not live**. Follow-up remains human-led.

Figure 5 - Signed-out Advisor Pipeline

Figure 6 - Persisted training request (focused)

Figure 7 - Demonstration records (layout only)

3. Operator workflow - Change Console

Route: <https://lux.corpflowai.com/change>

1. Open Change Console and locate **LEADS · LuxeMaurice CRM (concierge)**.
2. Find the request (use the **LM-REQ-...** reference when matching).
3. **Select the lead** - the list focuses on that row and **OPERATOR ACTIONS** appears directly underneath.
4. Update stage, owner, next action, or notes where supported, then save.
5. Use **Show all leads**, **Clear selection**, and **Focus list on this lead** as needed.
