Total in words

MUR FORTY FIVE THOUSAND ONLY.

Terms and Conditions

CorpFlowAI Ltd — commercial terms (standard ERPNext Terms and Conditions)

These terms apply to quotations and invoices issued from ERPNext. They do not replace a signed contract where one exists.

- Validity.** This quotation is valid for 14 days from the quotation date unless a different Valid Till date is shown on the document.
- Scope.** Scope is limited to the Item names and descriptions on this document. Anything not listed is excluded.
- Assumptions.** The client provides timely access, content, brand assets, and decision-makers. Delay in access pauses the delivery clock.
- Exclusions.** No SEO ranking, lead-volume, conversion, or revenue guarantees. Third-party hosting, domain, advertising, and software-licence fees are excluded unless a line item says otherwise. Recurring CorpFlowAI fees apply only when a recurring Item is listed.
- Payment — MUR project work.** 50% deposit by manual bank transfer before work starts; balance before production release or on delivery acceptance, as stated on the document. Proof-of-payment alone is not bank clearance.
- Payment — USD Lead Rescue launch pilot.** Setup is payable before the 48-hour setup window starts. Monthly monitoring, if listed, is invoiced in advance, month-to-month, with no auto-debit in this phase.
- Approval to build.** ERPNext documents are commercial records. The fail-closed financial approval-to-build gate remains the CorpFlowAI commercial rail (#714 / #766): quotation + written acceptance + payment evidence (or approved exception) + named financial approver. ERPNext does not auto-approve a build.
